Nepali

Hindi

EXPERIENCE

Awakened Devs • Fullstack Developer

Bhaktapur, Nepal • Feb 2024 - Nov 2024

- **Application Development:** Designed and developed a ticket booking application, focusing on system architecture, database design, and backend API production using *Node.js, Drizzle ORM,* and *PostgreSQL*.

- **Frontend Integration:** Ensured seamless integration with the frontend using *Next.js, Tailwind CSS, and TypeScript* for a smooth user experience.

- **Database Management:** Managed and optimized data workflows in *PostgreSQL*, ensuring scalability and performance.

- **Team Leadership:** Led a team of developers, delegating tasks, tracking progress, and meeting project deadlines.

Channakya Soft • Fullstack Developer

Kathmandu, Nepal • Feb 2023 – Dec 2024

- **API Integration:** Integrated pre-developed *RESTful* APIs into the frontend, ensuring seamless functionality and a smooth user experience.

- **Frontend Development:** Developed and optimized user interfaces using *Typescript, Vite, Tailwind CSS, React JS*.

- **Backend Contributions:** Created and enhanced *Rest API* APIs to improve system capabilities and functionality.

- **Database Management:** Worked with *PostgreSQL, and Drizzle ORM* to handle data storage and retrieval efficiently.

- **Collaboration and Growth:** Collaborated with senior developers, leveraging mentorship opportunities to improve both technical and professional skills.

SELECTED PROJECTS

BCEPS Charts

- Developed an interactive UI for displaying statics and charts of difference continent using *Typescript, Next JS, Tailwind CSS, and Recharts*.

- Enabled users to dynamically view different continent statistics.

Event Management System

- Developed an interactive UI for displaying different categories of events using *Typescript, Next JS, Tailwind CSS and Prisma*.

- Enabled users to view event list and book ticket.

- Developed an admin panel to add different events according to their category, price using *Prisma*.

- Created auth flow using *next-auth* allowing users to signIn and Login using *Prisma*.

- Created Role based access Control allowing admin to perform to create, update and delete events.
